

Description

This semi-automatic machine performs the riveting operation of the hinge in multipurpose ladder. The jigs ensure the correct positioning of the ladder and hinges. Hydraulic cylinders are responsible for the correct and easy riveting of the whole set.

Benefits

- Simplicity of use
- Quick operation
- Flexibility
- Ergonomic equipment

Characteristics

- Nest developed according to the articulation
 - Adjust of mounting limit positions
 - Mounting jig with 180° rotation and y-horizontal movement
 - Table lock for easy riveting
- Simultaneous riveting of all rivets from a hinge
- Operated by manual valve

Technical Data

- o: According to customer's product
- Nota: Customizable dimensions on request
 - Cycle time: 5 seconds
 - Power: 4 kW
 - Voltage: 400/230 V, three-phase, 50/60Hz
 - Hydraulic unit (integrated): 120 bar
